Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 18 and 34. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Widmayer.

Widmayer discloses a system comprising of a plurality of adjacent heat sinks 401, 402 and 403 that are sized such that a linear path for flowing air is not formed in the gap

Art Unit: 2835

between the adjacent heat sinks. Widmayer discloses the claimed invention except a plurality of processors being associated with each heat sink. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to have the heat sinks as disclosed by Widmayer to be attached to the microprocessors since it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 9 and 10 are rejected under 35 U.S.C. 102(a) as being anticipated by Wu. Wu discloses a heat sink 30, comprising: a base; and a plurality of fins 303 coupled to the base; wherein the heat sink is sized such that when the heat sink is placed adjacent to a like heat sink a linear path for flowing air is not present between the adjacent heat sinks; the heat sink is sized such that the heat sink includes an offset portion 301, 302 that is sized to mate with a coordinate portion in an adjacent heat sink.

Claim Rejections - 35 USC § 103

6. Claims 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wu.

Wu discloses the claimed invention except that the heat sink having the rectangular shape.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to make the heat sink rectangular as shown in the most prior art listed in attached US PTO 892 Form but not applied at this time, since such modification would be a designer's choice.

Allowable Subject Matter

7. Claims 23-25 are allowed.
8. Claims 2-8 and 15-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
